Afiniti Software Solutions Private Limited   Aug 2020 – Sep 2020
Project Trainee Program   *Lahore, Pakistan*

- Worked on the testing of real time users-based live application.
- Worked on the testing of real time users-based live application Helped to improve the application in the quality assurance department

Projects

Laravel CRUD Product Management | *PHP, MySql, Laravel*   August 2023

- Developed a Laravel-based web application for seamless product information management, encompassing CRUD functionality for creating, reading, updating, and deleting product records.
- Utilized MySQL as the database system to store and manage product information, including product names, descriptions, prices, and quantities.
- Developed a "Show Product List" feature that enables users to view a comprehensive list of all available products.

MERN CRUD Product Management | *ReactJs, Node.js, Express.js, MongoDB*   July 2023

- Developed a comprehensive Product Management System using the MERN (MongoDB, Express.js, React, Node.js) stack.

- Designed and implemented a full-stack web application allowing CRUD (Create, Read, Update, Delete) operations for product data.
- Utilized MongoDB as the database to store and manage product information, ensuring efficient data storage and retrieval.
- Developed RESTful APIs using Express.js to enable seamless communication between the front-end and the back-end, allowing for smooth data manipulation.
- Created an intuitive user interface with React, enabling users to view, add, update, and delete product information with ease.
- Implemented user authentication and authorization to ensure secure access and data integrity within the system.

Air Canvas Writing System (FYP) | *OpenCv, PostgreSQL, Python, Django , Google API*   **January 2021**
- Developed an application allowing users to write on the screen using finger gestures captured by the camera.
- Utilized OpenCV for camera input and image processing to detect finger gestures.
- Employed Python as the primary programming language to build the application.
- PostgreSQL as the database system to store user data or application-related information.
- Integrated Google API to convert the text written on the screen into speech, providing valuable assistance to individuals who are deaf and mute.

Web Application Development | *HTML, CSS , JavaScript , Jquery , MySQL*   **July 2020**
- Utilized MySQL as the database system to store and manage restaurant data, including menu items, prices, and customer information.
- Implemented a user-friendly interface with HTML and CSS to create an attractive and responsive web application.
- Designed a "Show Menu" feature that allows users to view the restaurant's menu items, along with descriptions and prices..
- Incorporated JavaScript to enable interactive functionality within the system, enhancing the user experience.
- Created a "Calculate Bill" feature that calculates the total bill for customers based on their selected menu items and quantities.
- Included administrative features for managing menu items, adding new items, updating and prices.

Certificates

Certification of Introduction to Front-End Development | **Feb 2023**
- Online course Meta - coursera

Certificate Completion For Manual Testing | **June 2022**
- Online course - QA Jobs In Lahore

Technical Skills

Languages: JavaScript, Jquery , Bootstrap , PHP , ReactJs , Angular , C++ , HTML/CSS , Laravel , SQL
Developer Tools: VS Code, PHP Studio , Sublime
Technologies/Frameworks: GitHub, JIRA , Laravel
